

Mod-Quad

DIVERSITY VIDEO RECEIVER

The Mod-Quad is a compact 4 antenna Video Receiver with a system of diversity antenna selection so advanced, it hasn't yet been named. Superb stability with moving cameras, multiple sets and near impossible locations. On-screen operations by remote control.

BNC ANTENNA CONNECTORS
AUTOMATIC OPERATION
ON-SCREEN CONTROLS
INTELLIGENT VOTING
REMOTE CONTROL

The antenna inputs are self-terminating, so a single antenna may be connected for non-diversity operation, or two to four antennae for true diversity reception.
